# PROJECTS

## 1. Get Hired 🔗

A **Full Stack Job Portal** built using React.js with a focus on user-friendly design and streamlined **job management**. The platform, created with Tailwind CSS, Supabase, Clerk, and Shadcn UI, offers intuitive features for job seekers and employers alike.

**Key Features:**
- **Clerk Authentication** -Secure, multi-method user authentication for easy access.
- **Job Search & Post Job** - Advanced search and filtering options for job seekers.
- **Application Tracking** - Real-time application tracking for job seekers and a management dashboard for employers to monitor candidates.
- **View Applications -** In-depth application views and management features for recruiters, including candidate notes and shortlisting.

**Tech Stack:**
- **React.js, Tailwind CSS, Shadcn UI** for a dynamic and responsive frontend.
- **Supabase** as the backend database.
- **Clerk** for secure authentication.

**Github Link** 🔗

## 2. Skin Store Clone 🔗

Developed a clone of a skin products store, replicating the design, product layout, and essential functionality of an **e-commerce** site. The platform provides a smooth **shopping experience** with user-friendly features and an attractive interface.

**Key Features:**
- **User Authentication** - Secure login and registration for a personalized user experience.
- **Product Sorting and Filtering** - Effective filtering by categories, price, and ratings to help users find desired products quickly.
- **Shopping Cart and Checkout** - User-friendly cart management and a seamless checkout process.
- **Payment Gateway Integration** - Simulated payment system for a secure purchase experience.

**Areas of Responsibility:**
Dynamic landing/Homepage page, Product page.

**Tech Stack:** JavaScript | CSS | HTML | JSON | Local Storage

- **A collaborative project, developed in 4 days by a team of 5, demonstrating effective teamwork and rapid development.**
