# App project 4 – Feedback rating

Project Description: Feedback Submission App

Objective: The objective of App Project 4 is to design and develop a user-friendly feedback submission application. This app will allow users to provide feedback on a product, service, or experience. The primary goal is to capture the user's input efficiently and display the feedback on the main page.

Key features: The app includes the following key features:

1. Home page: Once the app is run, it should show the review page with a link to review page. For example, to review a bag:

4.6 Stars   13 Reviews

WRITE A REVIEW

2. review page, user input:
- Rating Score: Users can rate their experience on a scale of 1 to 5, with 1 indicating "Not Satisfied" and 5 representing "Excellent."
- Review Feedback: A text field will be provided for users to input their feedback. • Review user: Users will be required to enter their username or identifier.

Write a Review

Your feedback will help other shoppers make good choices, and we'll use it to improve our products.

Review guidelines

Rating *

★ ★ ★ ★ ★

Review *

ⓘ Make your review great: Describe what you liked, what you didn't like, and other key things shoppers should know (minimum 10 characters). The most helpful reviews are 200 characters.

Review title *

ⓘ Your overall impression (150 characters or less)

3. Feedback Submission:
- Upon entering the necessary details, users will have the option to submit their feedback.
- The app will validate the input to ensure all fields are completed correctly.

4. Display Feedback on Main Page:
- Once submitted, the feedback will be instantly displayed on the main page. • The main page will show the username, feedback, and corresponding rating score for all submitted feedback entries.

Loving the Backpack

Order arrived in a timely manner. The backpack is the perfect size and the color is amazing.

Outcome: The final product will be an intuitive app that streamlines the process of submitting and displaying user feedback.

Grading: Complete working app with all requirements: 70 points

Submission: Upload all files and folders from App 4, except the virtual environment, to the GitHub repository, and host the live app on a hosting server.
